### 2022 Corn Hybrids

**GV 8072 VT2 Pro RIB**
- Full - Flex hybrid
- Great silage corn
- Excellent on tough acres

**GV 8102 VT2 Pro RIB**
- Responds to high management
- Great standability
- Great test weight

**GV 8212 VT2 Pro RIB**
- Semi-determinate ear
- Very good test weight
- Excellent plant health

**GV 8392 VT2 Pro RIB**
- Widely adapted hybrid
- Excellent greensnap score
- Great stalks and roots

**GV 8472 VT2 Pro RIB**
- Yielding machine
- Place anywhere corn
- Nice fall appearance

### 2022 XtendFlex® Varieties

- **NEW! GV 35XF2**
  - Solid overall performance
  - Great standability
  - Excellent early variety

- **NEW! GV 37XF2**
  - Excellent emergence
  - Very good SDS
  - Wide Adaptability East to West

- **NEW! GV 39XF2**
  - Excellent 30” row bean
  - High yielding
  - Medium plant height

- **NEW! GV 40XF2**
  - Medium - Bush
  - Excellent yield across all environments
  - Very attractive bean

- **GV 43XF1**
  - Excellent standability
  - Great disease package
  - Medium height

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer’s acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com.

Seeds containing the Enlist, Herculex and PowerCore traits are protected under numerous US patents. Seeds containing patented traits can only be used to plant a single commercial crop and cannot be saved or replanted. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements detailed therein (www.corteva.us/Resources/trait-stewardship.html). To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience (or other affiliate) in effect at the time of planting of this seed. Always read and follow herbicide label directions prior to use: Enlist® products contain the Enlist trait that provides crop safety for use of labeled over-the-top application of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist® crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products.

The transgenic soybeans event in Enlist E3® soybeans is jointly developed and owned by Dow AgroSciences LLC and M.S. Technologies, L.L.C. ™ Enlist, Enlist E3, the Enlist E3 logo, and Colex-D are trademarks of The Dow Chemical Company (“Dow”) or an affiliated company of Dow. Excellence Through Stewardship is a registered trademark of Excellence Through Stewardship.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3® soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Dow AgroSciences technologies can be found at the following webpage: www.corteva.us/Resources/trait-stewardship.html

**The Enlist™ System - Get Control of Tough Weeds**

- New 2,4-D Choline
- Glyphosate
- Glufosinate

**Enlist Duo®**

- Convenient blend of 2,4-D choline and glyphosate
- Two modes of action to deliver control and help prevent resistance in your fields

**Enlist One®**

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Ability to tank-mix with Liberty® herbicide and other qualified herbicides, customizing the ratio of herbicides to match each farm's needs

---

**On-Target Applications**

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester
**2022 Conventional Varieties**

**GV 39C9**  
High yielding non-GMO bean  
Excellent standability  
Medium bush plant type

**2022 Wheat Varieties**

**GV 619**  
Great early line  
Outstanding test weight with great yield

**GV 631**  
Broadly adapted to fit all soil types, excellent disease scores, multi-year top yielder!

**NEW! GV 652**  
Top-end yield  
Heavy test weight  
Excellent standability

**GV 668**  
In house testing shows the test weight is something to brag about. Excellent straw with this variety and a top yielder in university trials.

Ratings Scale 1 Excellent - 5 Poor
Verification Required: The last patent on the original Roundup Ready® soybean trait expired a few years ago and U.S. farmers may legally plant saved seed from some varieties of soybean containing the Roundup Ready® soybean trait. However, it is important that you check with your seed supplier to determine if a specific Roundup Ready® soybean variety is covered by other intellectual property rights, and if so, the policy for saving seed of that variety.

Higher Seeding Rate: A higher seeding rate may be required for bin-run Roundup Ready® soybeans compared to new branded seed.

Yield Loss: Roundup Ready 2 Yield®, Roundup Ready 2 Xtend® and XtendFlex® soybean varieties typically have a higher yield opportunity than Roundup Ready® soybean varieties.

Cleanout Loss: Loss of seed and/or shrink occurs during the seed cleaning and handling processes for bin-run seed.

Seed Treatment Costs: Treating your seed will add costs—both the cost of the treatment and the application of that treatment.

Lost Income: Every bushel of saved seed you plant is a bushel you’re not selling as commodity grain.

Increased Seed Management: If you plan to save and bin-run Roundup Ready® soybeans for planting, you will have to manage your harvest operations and grain storage so that the seed isn’t co-mingled with other seed that’s covered by intellectual property rights.

For more information on seed intellectual property protection, or to anonymously report a tip, please call 1-866-99-BAYER. For a list of relevant patents visit www.monsantotechnology.com

Think Before You Bin Run

High Value of New Branded Seed

LATEST TECHNOLOGY
- High-yielding soybean technologies
- Better variety options
- Leading seed treatment options

CUSTOMER SERVICE
- Dealer agronomic support before and after the sale
- Replant policy support
- Convenient packaging and delivery

RELIABLE GERMINATION AND QUALITY
- Rigorously tested and meets U.S. Federal Seed Act requirements
- Free of seed-borne diseases
- Properly stored and conditioned

Seed containing the XtendFlex® traits can only be used to plant a single commercial crop. It is unlawful to save and replant XtendFlex® soybeans. Additional information and limitations on the use of this product are provided in the Technology Stewardship Agreement and the Bayer Technology Use Guide: https://tug.bayer.com. Bayer, Bayer Cross, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup Ready®, Roundup® and XtendFlex® are registered trademarks of Bayer Group; Celeron®, RIB Complete®, Roundup Ready 2 Technology and Design™, Roundup Ready 2 Xtend®, Roundup Ready®, Roundup® and Respect the Refuge® are registered trademarks of National Corn Growers Association. Ac- celor®, Rb Complete®, Roundup Ready 2 Technology and Design™, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup Ready®, Vt Double PRO®, and XtendFlex® are trademarks of Bayer Group.
